

Knitting Techniques

- **Knit:** Knit is a basic knitting technique where loops of yarn are interlaced to create fabric, typically using two needles.
- **Purl:** Purl is a knitting technique where the yarn is brought to the front of the work and the stitch is made in the opposite direction.
- **Cast On:** "Cast on is the initial step in knitting, creating the first row of stitches on the needle before beginning a project."
- **Bind Off:** Binding off is the final step in knitting where loops are passed over each other to secure the last row.
- **Increase:** Increase in knitting refers to adding stitches to the fabric, typically by working into the same stitch multiple times.
- **Decrease:** Decrease in knitting is the technique of reducing the number of stitches in a row, typically to shape the fabric.
- **Yarn Over:** A yarn over in knitting is a technique where the yarn is wrapped around the needle to create an extra stitch.
- **Cable:** A cable in knitting refers to a technique where stitches are crossed over each other to create a twisted effect.

Knitting Tools

- **Cable Needle:** A cable needle is a small needle used to hold stitches when creating intricate cable patterns in knitting projects.
- **Yarn:** Yarn is a long continuous length of interlocked fibers commonly used in knitting to create fabric or items.
- **Needles:** Needles are long, slender tools with a point at one end used in knitting to create stitches with yarn.
- **Stitch Markers:** Stitch markers are small rings or clips used in knitting to mark specific points in a pattern or to indicate a stitch repeat.
- **Row Counter:** A row counter is a tool used in knitting to keep track of the number of rows completed in a project.
- **Tape Measure:** A flexible tool used to measure the length of knitted pieces, typically featuring a retractable blade with measurements marked.
- **Scissors:** Scissors are small cutting tools used in knitting to trim yarn and threads, essential for finishing and clean cuts.

Yarn

- **Fiber:** Fiber refers to the material used to make yarn, such as wool, cotton, or acrylic, that is spun into strands for knitting.
- **Blend:** Blend refers to a yarn made from mixing different fibers together, resulting in a unique texture, color, and performance.
- **Ply:** In the context of yarn, ply refers to the number of individual strands twisted together to form a single yarn.
- **Loom:** A loom is a tool used in weaving yarn to create fabric by interlacing threads in a specific pattern.
- **Yarn:** Yarn is a long continuous length of interlocked fibers used in knitting to create various textile products like clothing.
- **Knit:** To knit is to create fabric by interlocking yarn loops with needles, typically using two needles to form stitches.
- **Crochet:** Crochet is a needlework technique that uses a single hook to create intricate designs by looping yarn or thread.
- **Skein:** A skein is a length of yarn twisted into a compact, oblong shape, typically used for knitting or crocheting projects.
- **Needle:** A slender, pointed tool used in knitting to manipulate yarn and create stitches in various patterns and designs.
- **Pattern:** A set of instructions, often written or visual, guiding the process of creating a specific design or shape in knitting.
- **Weave:** Weave in knitting refers to the process of intertwining yarn to create a fabric or pattern, typically done using a loom.
- **Spinning:** Spinning in knitting refers to the process of twisting fibers together to create yarn, often done using a spinning wheel.
- **Dye:** Dye is a coloring substance used to add color to yarn in the process of knitting, creating a variety of hues.
- **Wool:** Wool is a natural fiber derived from the fleece of sheep or other animals, commonly used in knitting for its warmth.
- **Acrylic:** Acrylic yarn is a synthetic fiber made from acrylic polymers, commonly used in knitting for its softness, durability, and affordability.
- **Alpaca:** Alpaca yarn is a type of luxury yarn made from the fibers of alpacas, known for its softness, warmth, and hypoallergenic properties.
- **Mohair:** Mohair is a luxurious yarn made from the hair of Angora goats, known for its softness,

luster, and insulating properties.

- **Cashmere:** Cashmere is a luxurious and soft type of yarn made from the undercoat of cashmere goats, known for its warmth and softness.
- **Silk:** Silk yarn is a luxurious type of yarn made from silkworm threads, known for its smooth texture and beautiful sheen.
- **Tension:** Tension in knitting refers to the tightness or looseness of the stitches on the needle when working with yarn.

Yarn Weights

- **Jumbo:** Jumbo yarn weight refers to the thickest yarn category, typically used with large needles or hooks for quick projects.
- **Aran:** Aran is a medium-weight yarn that typically consists of 10-12 wraps per inch and is suitable for knitting sweaters.
- **Bulky:** Bulky yarn is a thick and heavy weight yarn that is ideal for creating quick and cozy knit projects.
- **Chunky:** Chunky yarn is a thick, bulky yarn weight that is ideal for creating quick and cozy knitted projects.
- **Chunky Weight:** Chunky weight yarn is a thicker yarn, typically used for quick projects like scarves or blankets, with a gauge of 12-15 stitches per 4 inches.
- **Cobweb:** Cobweb is the lightest yarn weight category, extremely fine and delicate, typically used for creating intricate lace patterns in knitting.
- **DK:** DK stands for Double Knitting, a medium weight yarn that is thicker than sport weight but thinner than worsted weight.
- **Fine Weight:** Fine Weight yarn is a thin yarn typically used for delicate and lightweight projects such as lacework or fine garments.
- **Fingering:** Fingering yarn weight is a thin, fine yarn commonly used for delicate projects such as socks, shawls, and lightweight garments.
- **Heavy Worsted:** Heavy worsted yarn is a medium weight yarn that is thicker than worsted weight but not as thick as bulky.
- **Novelty:** Novelty yarns are unique, often textured or decorative, yarns that add visual interest and flair to knitted projects.
- **Laceweight:** Laceweight yarn is the thinnest weight of yarn used in knitting, typically used for delicate and intricate lace patterns.
- **Light Fingering:** Light fingering is a very fine yarn weight, thinner than fingering weight, often used for delicate lace projects in knitting.

- **Light Sport:** Light Sport is a lightweight yarn typically used for knitting projects that require a bit more drape and flexibility.
- **Medium Weight:** Medium weight yarn, also known as worsted weight, is a versatile yarn thickness ideal for knitting a wide range of projects.
- **Worsted:** Worsted yarn is a medium-weight yarn that is smooth, strong, and ideal for knitting projects that require structure and stitch definition.
- **Thread:** Thread in the context of yarn weights refers to the thinnest yarn weight category, typically used for delicate lace projects.
- **Super Bulky:** Super Bulky yarn is a thick, heavy-weight yarn that is ideal for quick knitting projects like hats, scarves, and blankets.
- **Sport:** Sport weight yarn is a medium-weight yarn, thinner than worsted weight but thicker than fingering weight, commonly used for garments.
- **Roving:** Roving in yarn weights refers to a thick, bulky yarn that is loosely spun and often used for hand knitting projects.
