

## **Modes of transportation**

- **Biking:** Biking refers to the act of riding a bicycle as a means of transportation, typically used for commuting to work.
- **Carpooling:** Carpooling is when multiple individuals share one vehicle to commute to work, reducing traffic congestion, costs, and environmental impact.
- **Walking:** Walking is the act of moving on foot from one location to another, often used as a mode of commuting.
- **Driving:** Driving involves operating a vehicle to travel from one location to another, typically using a car or other motorized vehicle.
- **Public Transportation:** Public transportation refers to services such as buses, subways, trains, etc. that are available for use by the general public.

## **Traffic conditions**

- **Traffic Jam:** A traffic jam is a situation where a large number of vehicles are stuck and unable to move smoothly.
- **Delays:** Delays refer to periods of waiting or slower than usual movement experienced by commuters due to traffic congestion or accidents.
- **Road Closure:** Temporary blocking of a road due to construction, accidents, or special events, leading to traffic diversions and delays.
- **Gridlock:** Gridlock refers to a situation where traffic congestion is so severe that movement on the road comes to a standstill.
- **Detour:** Detour refers to a temporary route taken to avoid road closures or congestion while commuting to work.
- **Accident:** An accident in the context of commuting to work refers to an unexpected event causing damage or injury on the road.
- **Congestion:** Congestion refers to the excessive buildup of vehicles on roads, resulting in slow-moving or stalled traffic during peak commuting hours.

## **Public transportation**

- **Bus:** A bus is a large motor vehicle used to transport multiple passengers along a specific route, typically for commuting to work.
- **Subway:** Subway is an underground railway system consisting of trains that provide public transportation for commuting to work in urban areas.

- **Train:** A train is a form of public transportation that consists of a set of connected vehicles that run on tracks.
- **Tram:** A tram is a rail vehicle used for public transportation, typically running on tracks within a city for commuting to work.
- **Ferry:** A ferry is a boat or ship used to transport passengers and vehicles across a body of water for commuting.
- **Commuter:** A commuter is a person who regularly travels from their home to work or school using public transportation.
- **Schedule:** A timetable outlining the times and routes for public transportation services, such as buses or trains, for commuting to work.
- **Fare:** Fare refers to the amount of money paid to use public transportation services, such as buses, trains, or subways.
